

**SILK** Electric towel warmer for the bathroom with glass surface: the elegance and luxury of a natural, pure, smooth and fully recyclable material, for the comfort you've been looking for

Sophisticated finishes, polished and satin-finish surfaces can be used in elegant combinations, turning your bathroom into a special experiential space every day.

The temperature you want, in an instant, while the front glass surface heats up and, thanks to its properties, accumulates heat, emitting it through radiation, offering a sense of long-lasting, embracing comfort.

It is really compact, for a piece of furniture, and easy to install in any bathroom because it is just 40 cm long.

The controls are positioned ergonomically and easy to understand and use. Available in two colours, classic ice white or modern anthracite grey, both embellished with sand colour towel rails.

## Heating Style

SILK turns your bathroom into a sanctuary of wellbeing, offering you the comfort you've always dreamt of.

The convection flow heats quickly, with a time saving of up to 40% compared to a traditional electrical radiator (\*).

At the same time, the glass heats up and, thanks to its heat accumulation properties, it heats by radiation, producing a long-lasting effect, with low energy consumption.

(\*). Tests carried out at the RADIALIGHT laboratory, comparing SILK with 2 electric fluid radiators with equivalent electrical power.

## Electronic Controls

SILK is intelligent, because it decides how much heat is needed to reach the required temperature, avoiding a needless waste of energy. But it offers you so much more. Its multiple operating modes allow it to adapt to your lifestyle. You can set a consistent and comfortable temperature, or you can program the unit, saving money when you're not at home. If, instead, you want to heat the bathroom when you want to and for as long as you want to, the timer function is your best choice.

## Technical Characteristics

- Moisture proof, powder coated back housing – Temper glass surface
- Dual heating system: radiation for all-round comfort, and convection for quick heating.
- Suitable as both main and accessory heating.
- Easy-to-use touch controls with LCD display.
- Electronic thermostat with automatic heat control, to avoid energy waste.
- Various operating modes: automatic, programmed, timer.
- Open-window alarm function.
- Fitted with 2 towel rails.
- IP 24 protection against water spray: safe even in the wettest places.
- Available in two colours: ice white and anthracite grey.
- Available pair of practical towel hooks\*

\*bathrobe hooks are sold separately
